Back-Bedding Sealant Lowers Residential Window Manufacturing Costs

BEACHWOOD, OH (June 10, 2005) – Tremco's TremGlaze branded window and door performance sealants announced the launch of an innovative two-part, reactive back bedding silicone sealant called TremGlaze S900. AAMA certified, this "cold applied" product enables plants to lower their material and application costs because they can use conventional pumping and automated XY application equipment, instead of purchasing expensive 'hot applied' pumping and XY upgrades.

Its quick green strength (3-4 hour set-up time) speeds up productivity and unit handling while reducing potential sash distortion. Its quick cure profile provides the strength and consistency necessary to confidently transport window and door units. The 100% neutral curing TremGlaze S900 has a 1:1 mix ratio (which reduces human or equipment error), is non-hazardous (contains no VOC's), and is also available in cartridge packaging for in-plant repairs and remakes.

The TremGlaze brand is part of Tremco's Sealant/Weatherproofing Division – the world's foremost supplier of sealant weatherproofing solutions for industrial, construction and passive fire control applications. TremGlaze is a single source supplier offering a wide range of AAMA approved sealants, extruded tapes and gaskets suitable for use in a variety of demanding residential glazing applications.

Tremco was founded in 1928 and, in 1997, became part of RPM International Inc., a holding company with subsidiaries that are world leaders in specialty coatings serving both industrial and consumer markets. For more information on TremGlaze, visit the website at www.tremcosealants.com or contact Troy Miller toll free at (866) 286-8273, ext. 7430; or at TMILLER@TREMCOINC.COM.

meanwhile

TREMCO'S TREMGLAZE S900 is a unique 1:1 Ratio, Two Component Reactive Back Bedding Sealant that offers **QUICK GREEN STRENGTH** and tenacious adhesion.

TremGlaze S900: Simple to use • up to 30% less expensive than reactive Hot Applied products • quick turnaround • exceptional long-term performance

AMAZING! TremGlaze S900 is changing minds on Reactive Sealant Technologies!
